

# Predicting High School Track Times

Dana Lindquist  
Project Luther  
October 12, 2018

High school track statistics  
are collected and stored at  
www.athletic.net

Given:  
9<sup>th</sup> grade PR (Personal Record)  
10<sup>th</sup> grade PR  
11<sup>th</sup> grade PR

Predict:  
12<sup>th</sup> grade PR

# Methodology

Athletes:

- 400 Meters - 826 athletes
- 1600 Meters - 2056 athletes
- Competed all 4 years in high school
- Graduated between 2006 and 2017

Features
Athlete Name (& ID)
Athlete Sex
9 <sup>th</sup> grade PR
10 <sup>th</sup> grade PR

Athletic Districts in Washington State

# Results

## Algebraic Model

Assume constant growth rate

$$\frac{t_{12}}{t_{11}} = \frac{t_{11}}{t_{10}}$$

400 Meters.      mean = 58.4 seconds

Model	RMSE
Algebra	3.7 (6.3%)
Linear regression	
Mixed Effects Model	
Add higher order terms to LR	

1600 Meters      mean = 317.0 seconds

Model	RMSE
Algebra	21.6 (6.8%)
Linear regression	
Mixed Effects Model	
Add higher order terms to LR	

# Linear Regression

400 Meters.      mean = 58.4 seconds

Model	RMSE
Algebra	3.7 (6.3%)
Linear regression	2.2 (3.7%)
Mixed Effects Model	2.1
Add higher order terms to LR	2.3

1600 Meters      mean = 317.0 seconds

Model	RMSE
Algebra	21.6 (6.8%)
Linear regression	13.5 (4.3%)
Mixed Effects Model	13.6
Add higher order terms to LR	13.4

Mixed Effects Model  
District as mixed effect

Add second order terms for  
(10<sup>th</sup> grade PR)<sup>2</sup>  
(11<sup>th</sup> grade PR)<sup>2</sup>

# Lasso

400 Meters

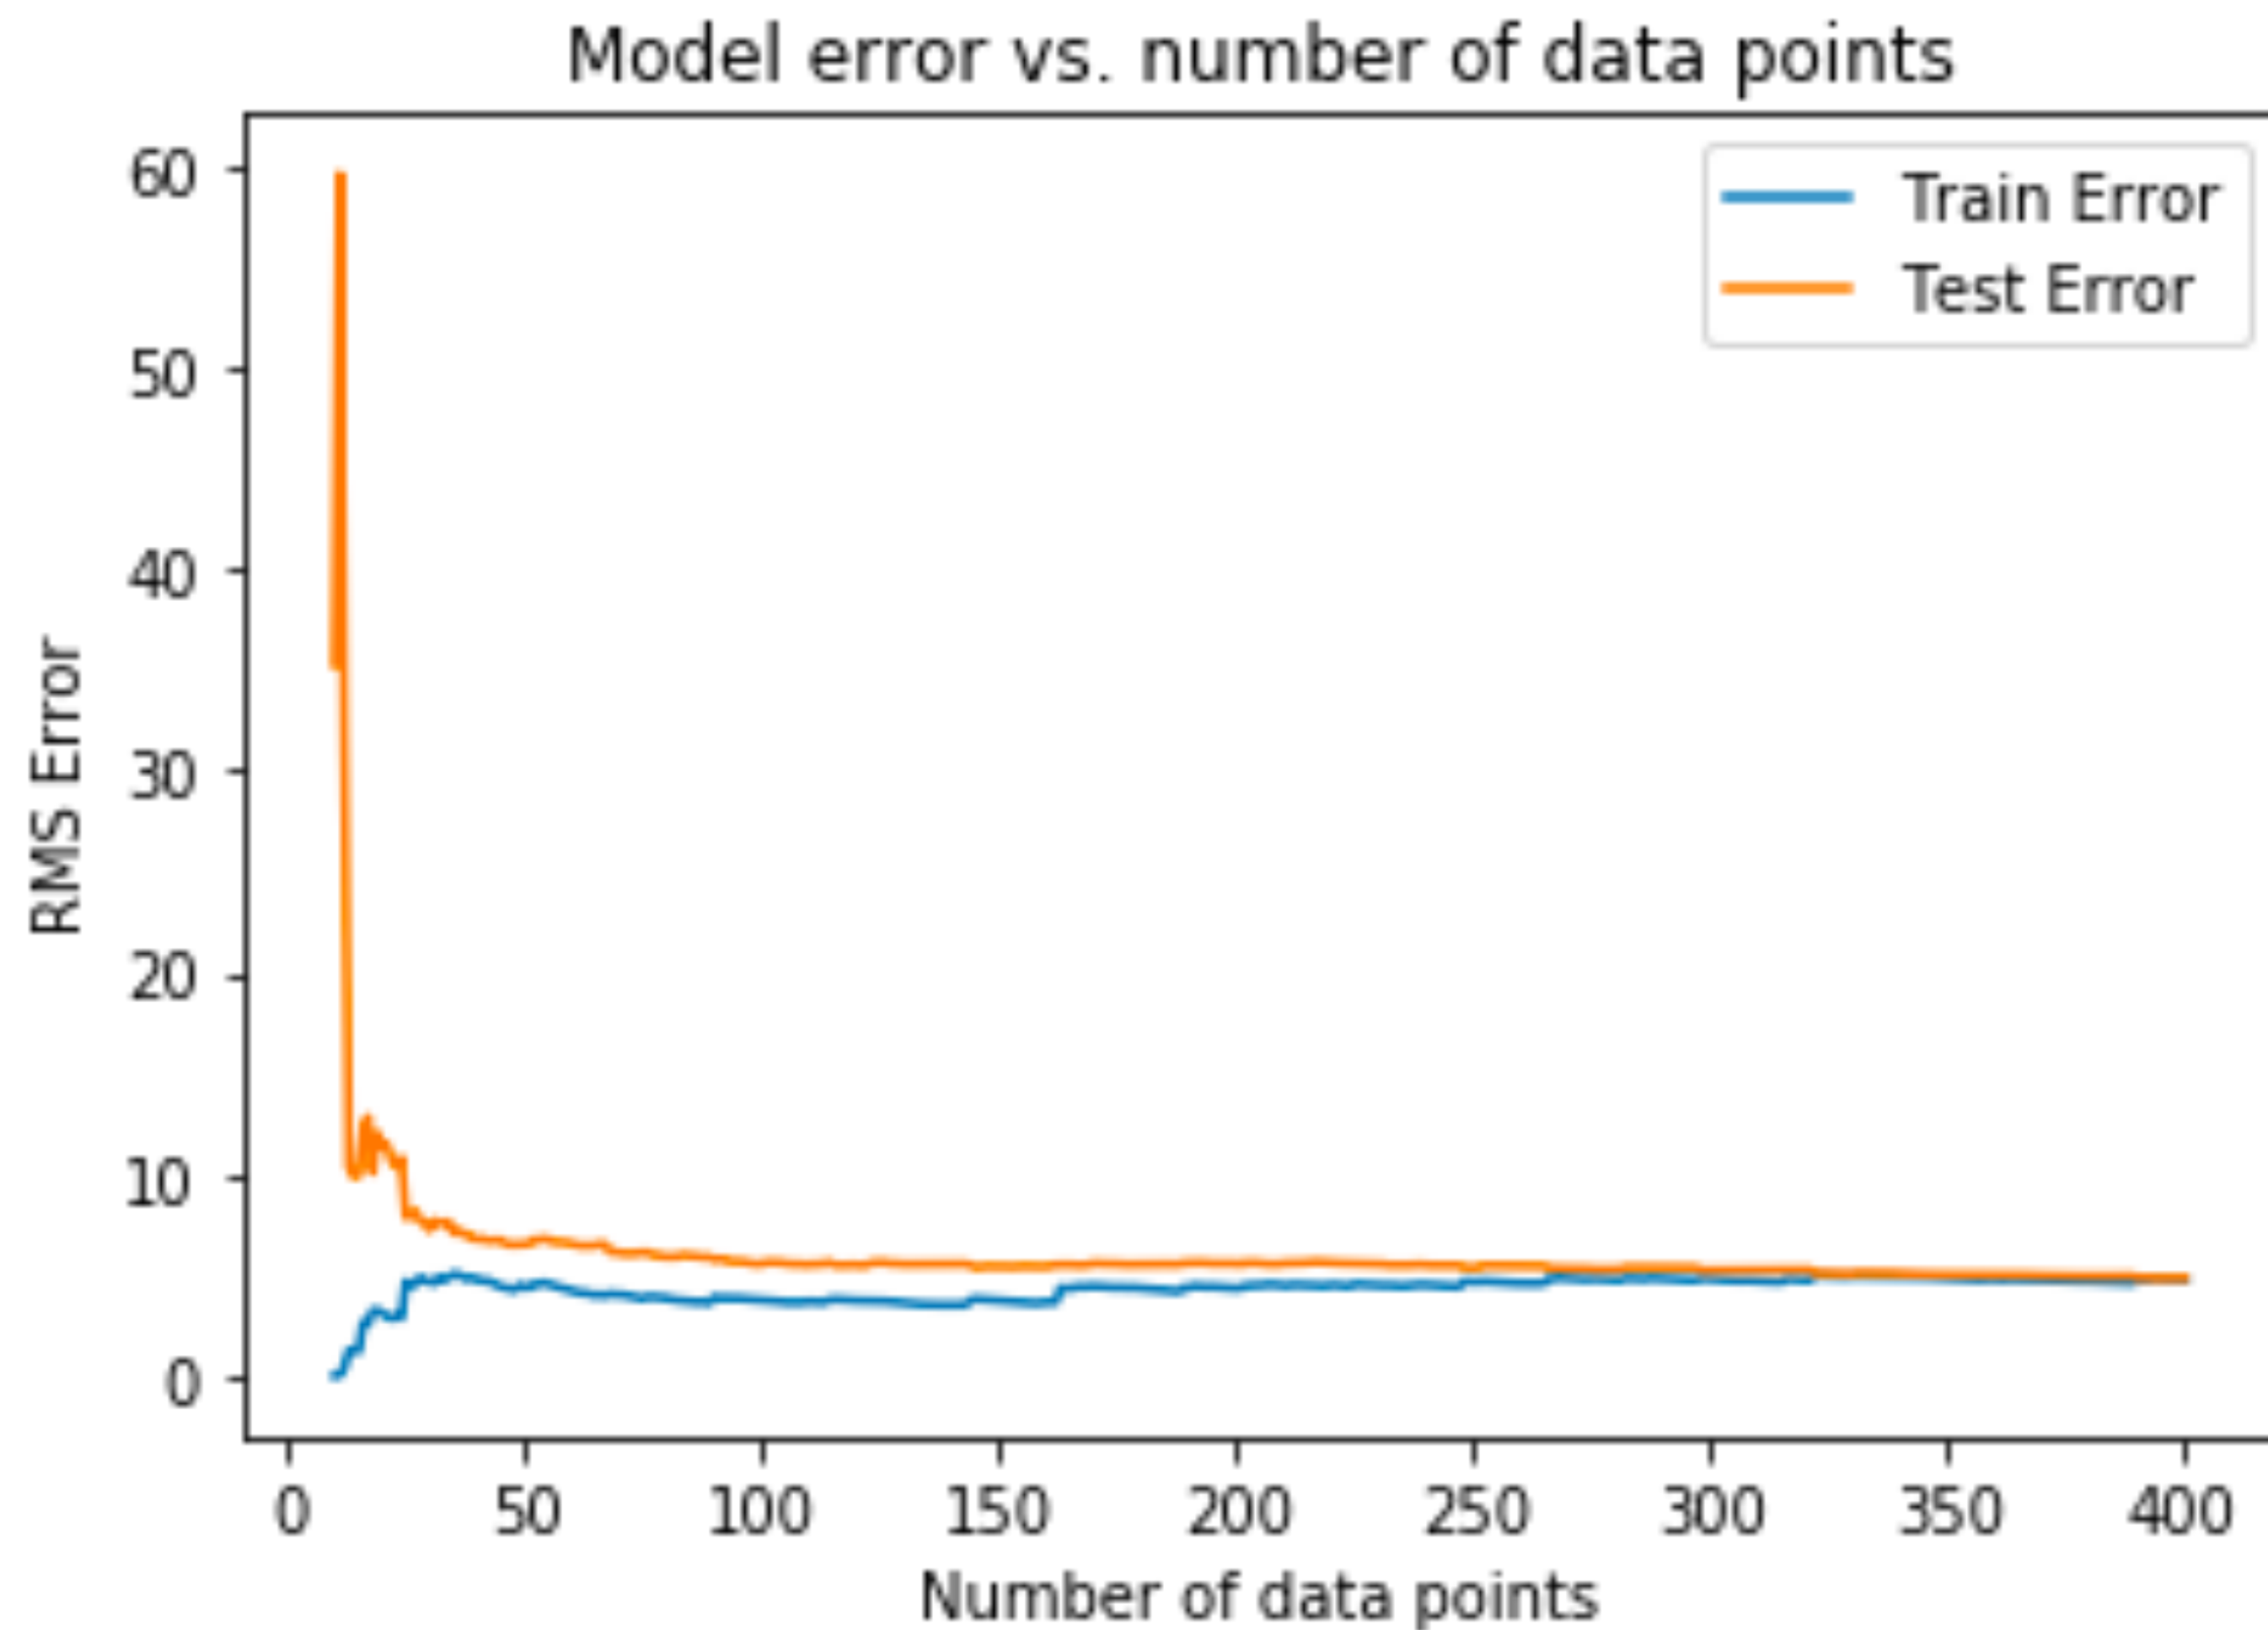

- **11<sup>th</sup> grade time**
- **10<sup>th</sup> grade time**
- Sex
- Athletic district becomes important

1600 Meters

- **11<sup>th</sup> grade time**
- Sex
- Graduation year becomes important

# Effect of #data points on model

It is possible to model with relatively few points

# Conclusions

- Machine learning models offer improvement over the algebraic model
- Require more features to get better prediction

# Future Work

- Add more features
  - Times for individual races
- Use this technique to predict field events
- Extrapolate to predict college times based on high school times (for recruiting)

# Appendix
